

CODIB-D-51/1
24 February 1960

UNITED STATES INTELLIGENCE BOARD
COMMITTEE ON DOCUMENTATION

Character Sensing Research and Development

1. This is additional follow-up on the presentation made by Mr. Howerton at the last CODIB meeting (CODIB-M-20, para.2) and the RCA presentation of 19 February.

2. At the suggestion of the Air Force, a technical discussion of their equipment by Baird-Atomic, Inc. of Cambridge, Massachusetts has been scheduled. Representatives of the various departments or agencies are welcome. For the purpose of continuity in coming to a community decision, it is suggested that, to the degree possible, the same people attend as were present at the RCA presentation.

3. The session has been scheduled for 0930 Thursday, March 10 in Room [redacted] CIA (the same room in which the RCA talk was given). Please call the Secretary as soon as possible with the names of those planning to attend [redacted]
